Detailed Action

Claims 1-27 have been presented for examination.

Claims 1-17 have been rejected.

Claims 18-27 have been allowed.

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 1-17 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In regard to claims 1-17

Claims 1-17 are not limited to tangible embodiments. In view of applicant's disclosure [specification page 13; line 2], the computer readable medium is not limited to tangible embodiments, instead being defined as including both tangible embodiment for example [solid-state memories, optical and magnetic disks] and intangible embodiments for example [carrier wave signals]. As such, the claims are not limited to statutory subject matter and are therefore non-statutory.

Reasons for Allowance

Claims 18-27 are allowed.

The following is an examiner's statement of reasons for allowance:

After a complete search of all the relevant prior art the examiner has determined the claims are in condition for allowance.

Art Unit: 2113

- A detection module configured to detect a navigation event without transmitting data to and from a server.
- A generation module configured to generate a user prompt in response to the navigation event and the difference.

Regarding claim 26,

The examiner finds the novel and non-obvious feature of claim 26, when read as whole to be:

- Detecting a client navigation event.
- Detecting a difference between a client data state and a base data state without communicating with a server.
- Generating a user prompt in response to the detected client navigation event and the detected difference.
